

Week 2 Assignment

Learning Objectives

Each week, there'll be a listing of objectives for that week of instruction. You should use these objectives to help you study the course material. If you can satisfy the objective, you've achieved the goals for that week of instruction and will be prepared for homework and exams

Chapter 3 – Controlling How Scripts Run

- Describe the features of the control structures supported by base
- Use the if statement in a program
- Use the test command to evaluate binary conditions
- Explain the function of reference variables

Chapter 4 – Interacting with the Environment

- Describe the types of environmental variables and their scope
- Identify the startup scripts associated with the bash shell
- Pass command line arguments into a program
- Modify a script to make it executable

Homework

Activities that are due during the week will be listed here. Make absolutely sure that you don't miss anything. Due dates will be posted in Moodle

- Read chapters 3 & 4 from the course text
- Watch the podcasts for this week (DL)
- Complete Week 2 Homework
